Parent/guardians contact: 08055664672, 08028095700

Mother occupation: Null

Father occupation: Unemployed

Address: 48, Odofin Akinsanya Street, Ajegunle Apapa, Lagos

Short Description of Yourself and Your Aspirations:

I am a gentle, positively minded person with brilliant features of an excellence student. I love to work with computer, without getting tired for about 6 hours nonstop. I am socially balanced with people, self courageous and I have not been staying with my parent for some years now. I started staying in LOTS charity foundation since 2011, when my family had issues of flood in our house at Dustbin Estate. LOTS foundation eventually became my permanent home when a fire incident that displaced a lot of families including mine occurred in 2013.

To me, life is a place where hard-work and good character will give you good success because the only place where success comes before hard work is in the dictionary. I have to work extra hours to feed myself, after my secondary school level by doing two jobs simultaneously in order to meet up to my physiological needs before I gained admission to higher institution. I want to become a computer engineer with difference, having skills on programming, ethical hacking and web development which will enable me to invent something new from my creativity.
